

Important News for Demountable Truck Body System Owners

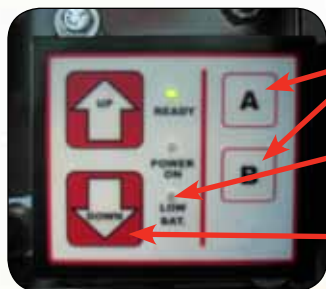

New Low Voltage Controller for Chassis Lift

Included on all NEW Units to Enhance Safety and Security

Upgraded features of New Controller Include:

- **Simple Keyed Security Code** - prevents unauthorized use
- **Auto Shutoff** - automatically shuts off unit after set period of time
- **Low Voltage Detector** - alerts operator when truck battery is low
- **In-Cab Illuminated Flood Light Switch on Alarm Panel** - notifies driver that rear-facing flood lights are turned on
- **Cycle Counter** - records how often the system is raised and lowered
