

Here's How this Easy-To-Use System Will Streamline Your Delivery Operation.

Beginning of the workday

There's no waiting for trucks to be loaded. Your delivery fleet is on the road because Demountable bodies were loaded the day before and are now ready to go.

Throughout the workday

Trucks are making deliveries with loaded bodies, while second or third bodies are being loaded.

End of workday

Trucks return to your facility and drivers swap empty bodies with full bodies so they're ready for an immediate start the following morning.
